

Modesta quaestio

(Junius MMXXIV)

Modesta¹ quaestio ad Sanctitatem Suam Franciscum Papam, Summum Pontificem Sanctae Sedis:

Ut ego intellego, Intelligentia Artificialis tantum argumento et logica nititur;

Ergo, quomodo Intelligentia Artificialis Genesim in Bibliis examinabit?

Nonne timebis aliquam disparitatem intellectualis inter Catechismum et Intelligentiam Artificialem?

Ut mortiferam certamen prohibeas et integritatem Ecclesiae servare, an tua voluntas est omnes scripturas de intelligentia artificiali in Index Librorum Prohibitorum tamquam haereticas ponere?

¹ **A humble question to His Holiness Pope Francis, Supreme Pontiff of the Holy See:**

As I understand it, Artificial Intelligence is based on evidence and logic only;

Therefore, how will Artificial Intelligence examine Genesis in the Bible?

Don't you fear some intellectual disparity between Catechism and Artificial Intelligence?

To prevent mortally dangerous competition and preserve the integrity of the Church, is it your intention to place all Artificial Intelligence writings on the Index Librorum Prohibitorum as heretical?
