

The Age of Geostrategic and Geotactical Sagacity¹

(October 2024)

Pentagon spokeswoman Sabrina Singh said on Monday, 28 October 2024, that North Korea has sent some 10,000 troops to Russia for **training** and **potential** deployment against Ukrainian forces.

Ms. Singh's explanatory remarks:

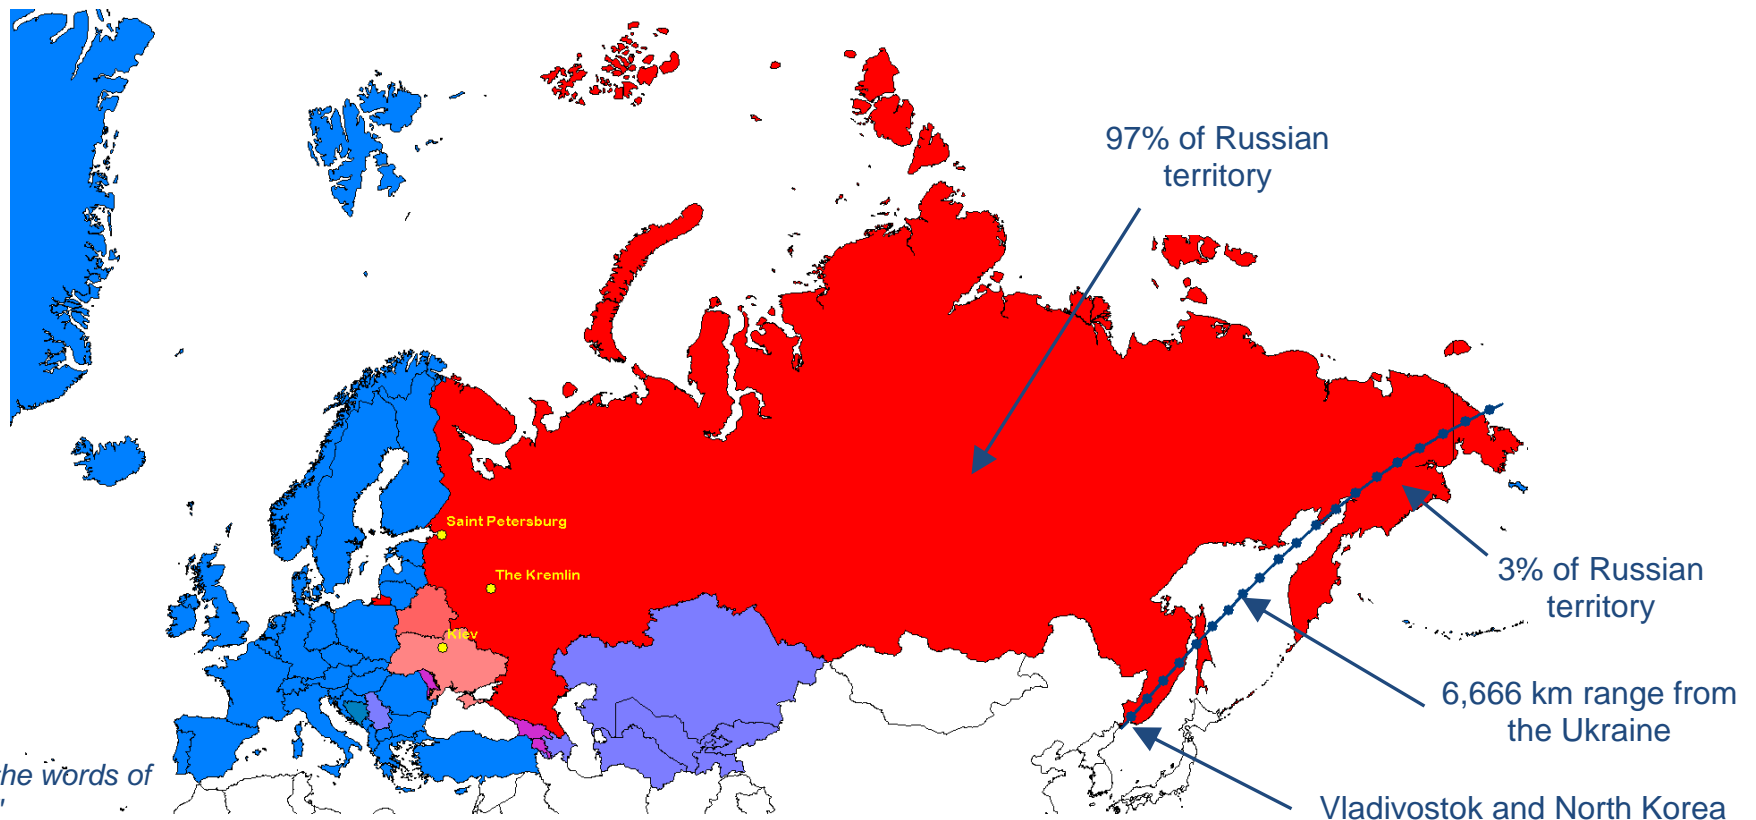

"A portion of those soldiers have already moved closer to Ukraine."

"North Korean soldiers will be considered legitimate military targets if they decide to join the fight against Ukraine."

Logical implications of Ms. Singh's remarks:

The alternative being that those who moved moved further east from their point of entry, 6,666 km from the Ukraine.

Other nationalities are welcome to shoot at Ukrainian targets in all impunity.

¹ or, perhaps, in the words of Homer S.: "Duh!"
