

HALLOWE'EN ¹ NIGHT, 2024

¹ Scottish shortening of *Allhallowe'en*, *All Hallows even*, *All Hallows Eve*: the evening before All Hallows' Day, All Saints' Day.
In the Gallic tongue, verbatim: "*Veille de Toussaint*".

On Hallowe'en night, 2024, Japan's chief cabinet secretary, Yoshimasa Hayashi, stated that *"based on the information we have obtained about the flight distance and altitude of the ICBM-class ballistic missile launched by North Korea, it is believed that depending on the weight of the warhead, the range could **exceed 15,000 km**"*.

Which may explain the sudden World's Elites' rush on Patagonian real estate.
