

Professional Résumé

SUBSEA & UMBILICAL INSTALLATION ♦ CREW & OPERATIONAL MANAGEMENT ♦ ROV SUPPORT & SUPERVISION

MULTI-MILLION DOLLAR PROJECT PLANNING ♦ DEEPWATER OIL & GAS INDUSTRY SKILL SET

SUCCESSFUL PROJECT EXECUTION ♦ MANAGING MULTIPLE NATIONALITIES ♦ CONTRACT COST CONTROLS

Highly experienced & skilled energy production industry manager specializing in deepwater projects. Utilize state-of-the-art subsea intervention to deliver offshore oil projects on time, with uncompromising safety. Strong diversity skills in communicating within international & multi-cultural environments.

Summary of Qualifications

EXPERTISE	Experienced in working with crews and technical teams to ensure delivery of client requirements and expectations, preparation of detailed reports, surveys, and documents for complex projects, assisting in support services for oilfield and energy sector subsea operations, and reviewing and evaluating procedures. Knowledgeable in evaluating personnel, procedures, technology, and services, implementing corporate programs and projects under strict deadlines, and serving as a key team member and leader.
COMMUNICATION	Well-developed communication skills demonstrated through expertise in multi-cultural and international knowledge of customs and business practices, generation of detailed technical reports, presentations, manuals, and memos, ability to work well with project managers, engineers, geoscientists, and vendors. Conduct quality assurance analysis, create recommendations and consulting deliverables, and ensure compliance with all company and inter-governmental requirements.

Senior Shift Supervisor/ Offshore Construction Manager; 2008 to 2016

AKER MARINE CONTRACTORS / EMAS AMC

Angola / Congo / Equatorial Guinea / Israel

- As Vessel Superintendent for a leading marine oil & gas industry subsea contractor, assigned to MSV Boa Sub C / Nobel Tamar 2x 140k umbilical installation, and Shell Popeye 40k umbilical installation. Currently oversee anchoring and mooring installation for U.S. / Norwegian sector Subsea Field development pipeline, as well as pigging and flooding operation, flooding and scaling control module, change-out and maintenance of subsea trees, and BOP methanol injection ROT. Conduct intervention, subsea jumper installation, manifold installation, EFL connections, and subsea field commissioning operations. For MSV Boa Deep C, handle pipeline pull-in to Chevron Blind Faith subsea well jumper subsea field development operations. For MSV Boa Sub C, handled jumper installation BP, and Mooring line installation Marathon.
- Responsible for the safe execution of scope of work in accordance with the relevant legislation, contract, company and project procedures, informing DP operators of any changes in status of operation, as well as all Deck and Subsea activities. Ensure that all personnel involved in the operation receive sufficient coaching and supervision to assist them in carrying out appointed tasks in a safe and effective manner.

Property Manager / Developer; 2009 to Present

VIEUX CARRÉ DREAM, LLC / 4416-4414 CANAL STREET, LLC

New Orleans, Louisiana

- Coordinate all aspects of property development and management for 4 rental units and over \$1 million in real estate. Buy and market high end furnished luxury rentals during a 3-year period. Duties consist of screening rental applicants, responding to guest concerns, collecting rent, contracting for repairs, meeting all applicable codes and regulations, ensuring safe premises, providing customer service, and maintaining an on-call status 24 hours per day.
- Additional duties include guest relations, facility maintenance, and related administrative duties. Supervise maintenance personnel for service requests, review and approve prospective tenants, and complete short-term rental negotiations, credit checks, and rental paperwork. Oversee move-ins / move-outs, make damage assessments, and approve deposit refunds. Collect rent, maintain computerized database of rent payments, and monitor late payments.

Owner / Manager; 2005 to 2007

KEMPER INDUSTRIES

Slidell, Louisiana

- Founded and operated a technical consulting firm with 25 employees providing electrical equipment recovery services to a variety of energy industry clients. Managed payroll, scheduling, accounting, report generation, HSC, and client relations. Primary client was CLECO.
- Purchased and sold trucks and skid steers with a monthly gross of up to \$250,000 and achieved nearly \$1.5 million in gross sales within a 6-month period. Coordinated closely with contractors and clients. Performed a wide range of organizational, public relations, and communication skills.
