

Supplement to Efficiency Expertise

(November 2024)

Whereas:

- A. The Efficiency Experts have promised to shave **50%** off the **\$3,869,000,000,000** Federal Government budget, thus saving the Nation the yearly amount of:

\$1,934,500,000,000

- B. The particularly ingenious and also quite novel managerial method the Experts intend to put to good use is to retire randomly ¹ and forcefully **50%** of the **4,297,743** Federal Government's current employees ², thus sending forthwith to the lines of the Department of Labor's Employment Offices (by then much depleted) a number of dismissed employees equal to at least:

2,148,871

- C. Meanwhile, the wealth of the more famous of the two Efficiency Experts, Mr. Elon Musk, has increased, **every minute** on the clock over the course of the **past 18 months**, by an amount equal to:

The accumulated lifelong salary earnings of the Average World Laborer,

Mr. Musk earning in one minute of time what an average world laborer earns in a lifetime.

Now, therefore:

Write in less than 12,000 words a doctoral dissertation in which you shall demonstrate in irrefutable terms that the individual mentioned in **C.** is by far the safest ethical choice to manage the People's money.

¹ Those with a Social Security Number ending in an odd numeral

² Apparently without expending too much on severance pay
