(November 2023)

**The surface area of Israel is:**

**0.17%** of that of the Arab World;

**0.08%** of that of the Muslim World.

**The surface area of Palestine is:**

**0.05%** of that of the Arab World;

**0.02%** of that of the Muslim World.

**The population of Israel is:**

**2.13%** of that of the Arab World;

**0.52%** of that of the Muslim World.

**The population of Palestine is:**

**1.20%** of that of the Arab World;

**0.29%** of that of the Muslim World.

**Furthermore, in comparison to the stated colonial status of the Gaza Strip, at their respective cumulative apogees:**

The British colonial empire was **80,000** times as large <sup>1</sup>;

The French colonial empire was **50,000** times as large;

The Spanish colonial empire was **30,000** times as large;

The Portuguese colonial empire was **30,000** times as large.

**Surely, a reasonable Concert of Nations should be able to somehow help devise a fair solution acceptable to all parties.**

---

<sup>1</sup> Note: it would take more than four Gaza Strips to equal the surface area of Greater London (and 23 to equal London's metropolitan area).
