

A PROPOSAL FOR A PORT FACILITY ALONG THE GAZA STRIP SHORE

8 March 2024, with subsequent updates

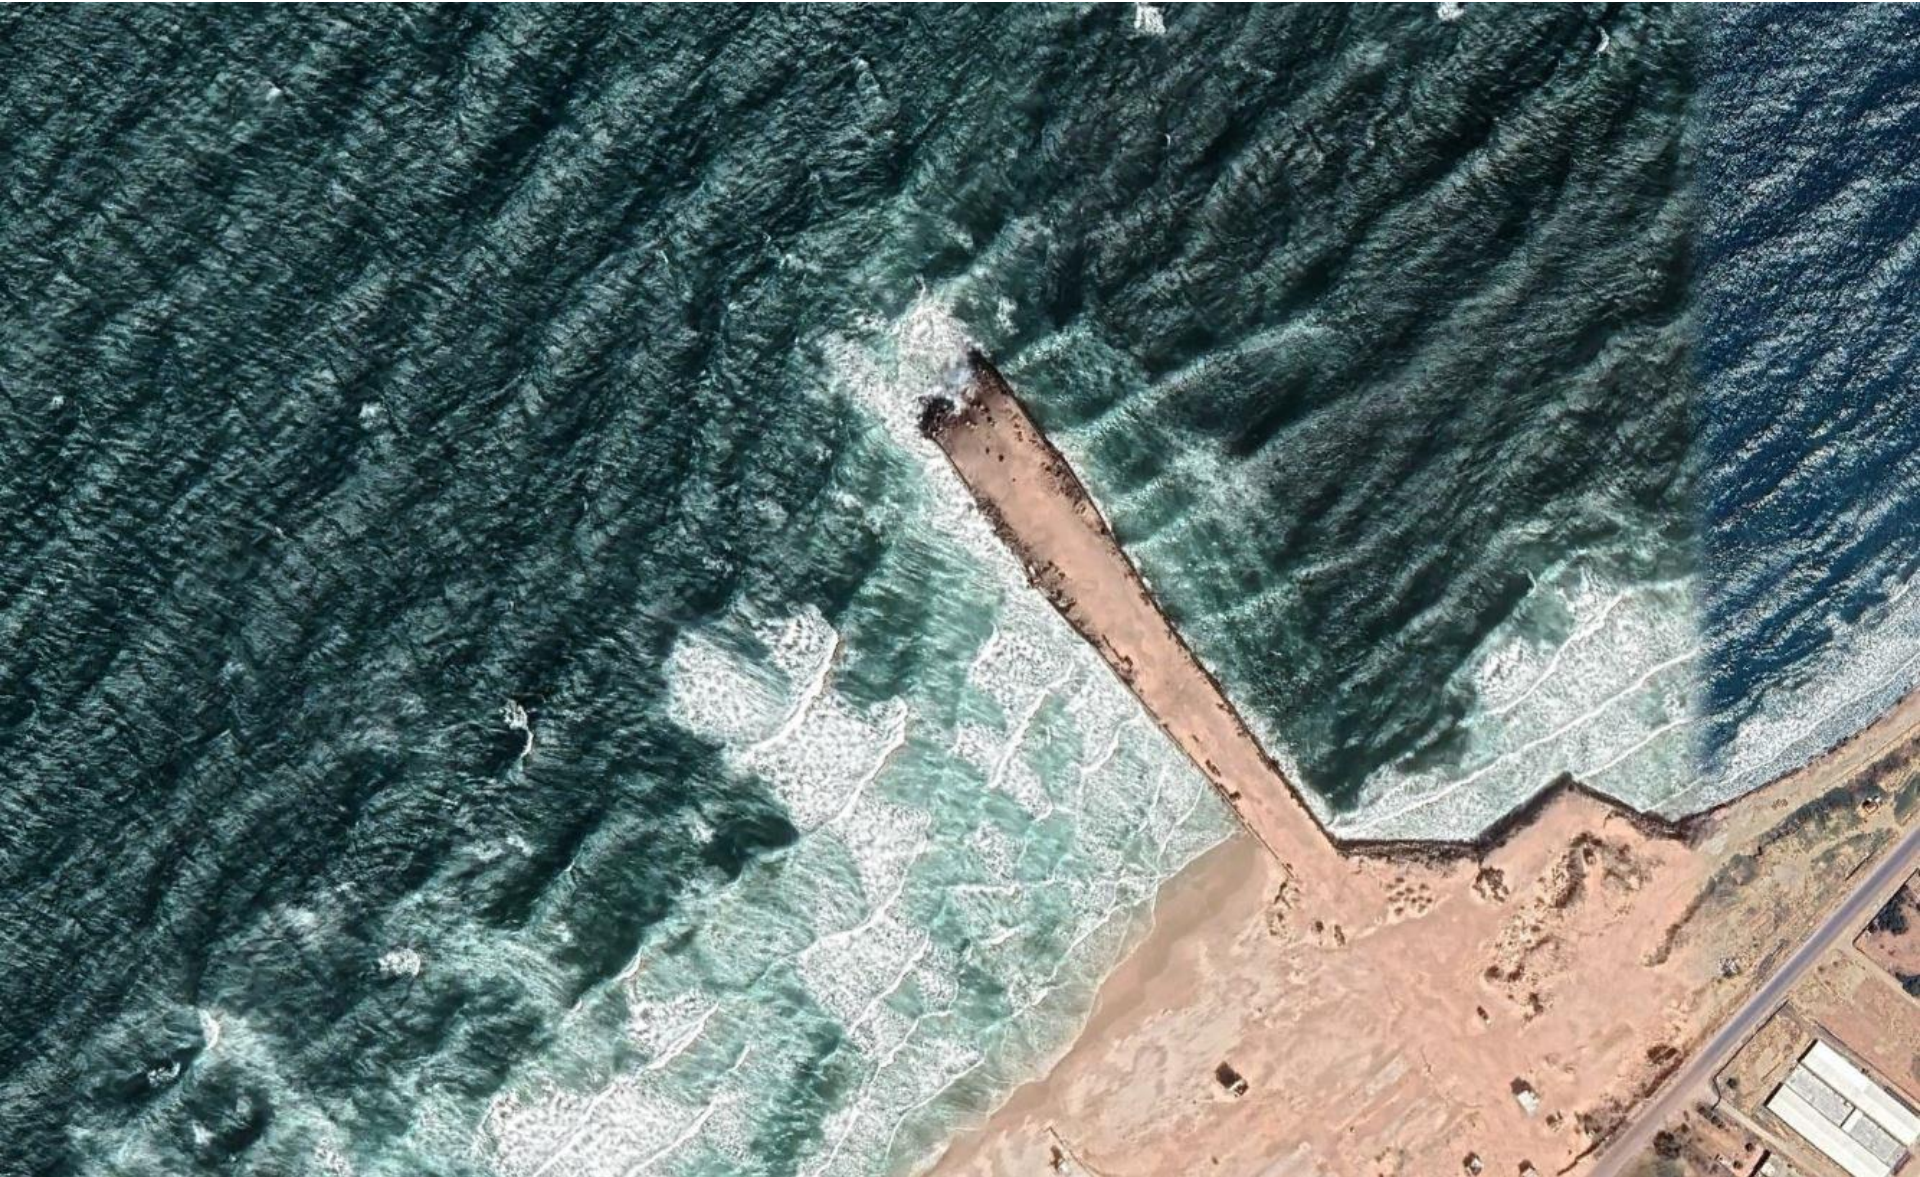

The Gaza Strip coastline is straight and inhospitable, with no natural shelter

An attempt was made between 2016 and 2019 to build a new port
at location $31^{\circ} 23.9' \text{ N}$, $34^{\circ} 18.2' \text{ E}$

The facility is reportedly called Khan's New Port. Its length is 300 m

Satellite picture taken in January 2023

Rough sea state is apparent. Wind fetch is more than a thousand nautical miles of open water

Winter gales are frequent. Here the seashore near Gaza City on 16 January 2019

Strong gale, wind WSW 41 kts; maximum wave WNW 7.0 m (23 ft), very rough to high seas

A storm 40 nautical miles north of Gaza on 6 February 2023

Gale, wind W 38 kts; maximum wave WNW 6.9 m (23 ft), very rough to high seas

10, 15, 20 meter depth contours

Dynamic-Docks and U.S. military floating pier near Gaza City (31° 29.8' N, 34° 24.4' E)

Note: aircraft carrier and runway on dock are shown for illustrative purposes only.

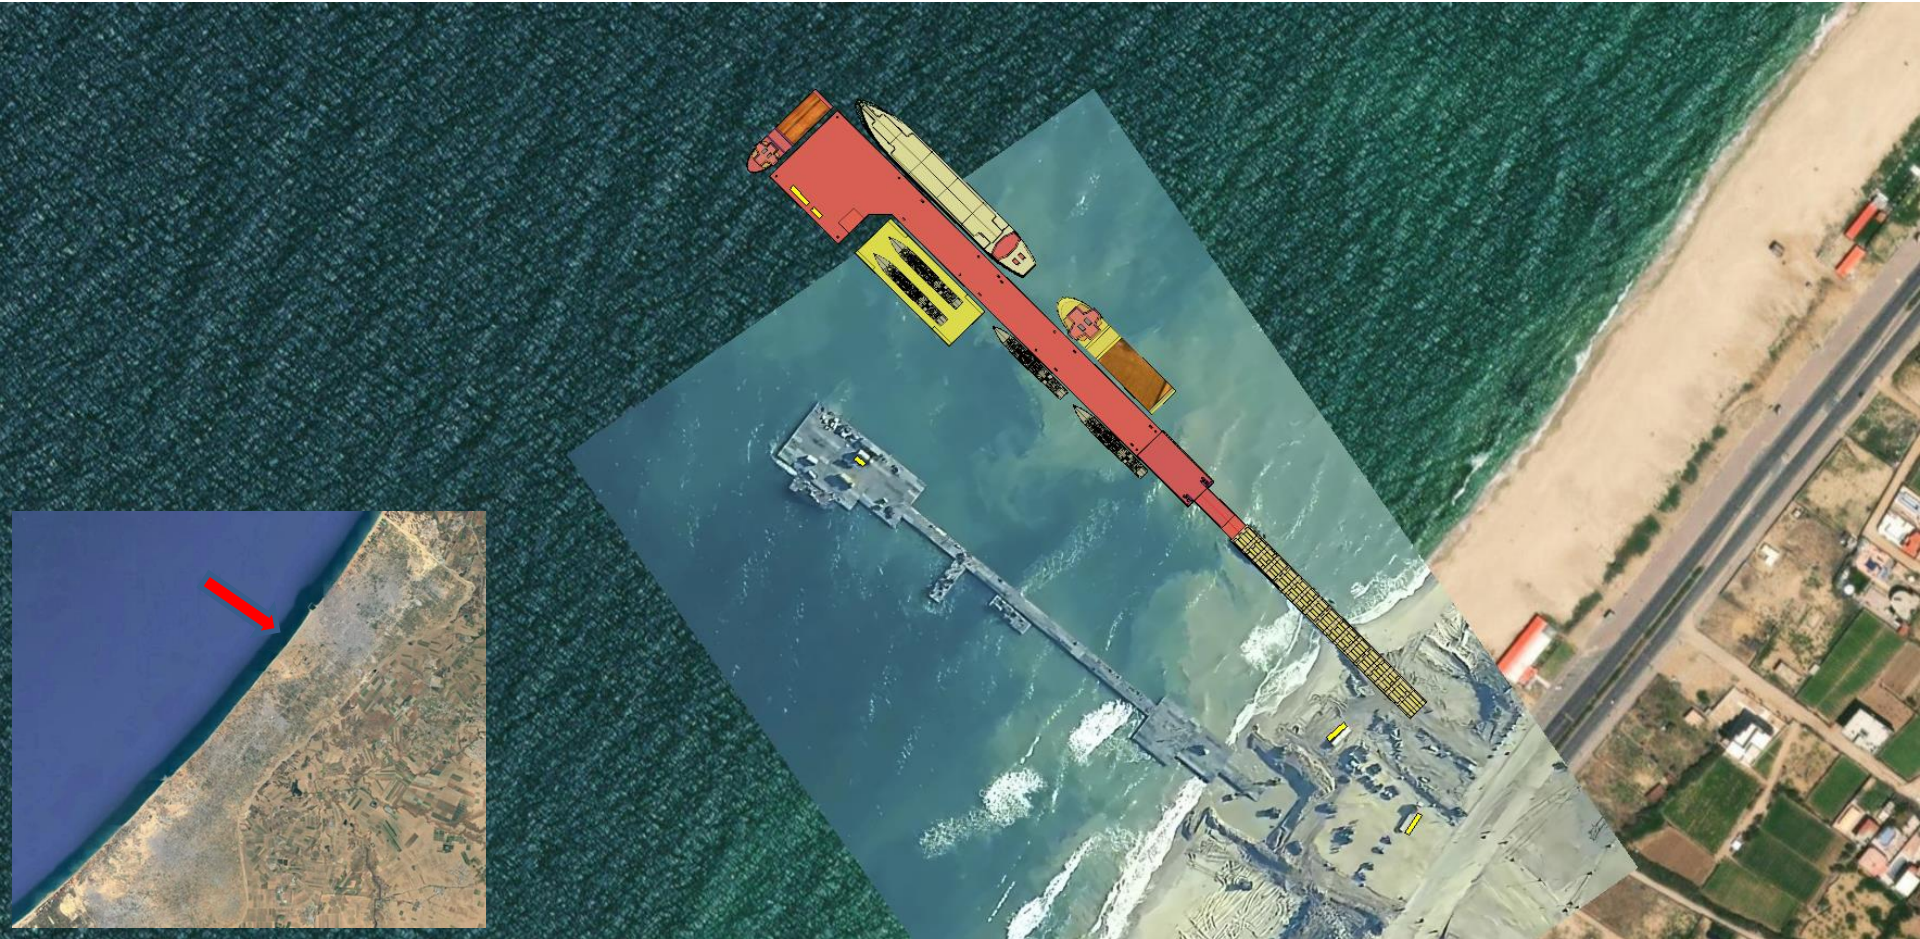

Dynamic-Docks: \$110 million
U.S. military floating pier: \$320 million

Dynamic-Docks shorter alternative

Dynamic-Docks: \$40 million , safe behavior in winter gales
U.S. military floating pier: \$320 million, dismantled in a light to gentle breeze
with slight to moderate seas

U.S. ‘Floating Pier’ for Gaza Damaged by Choppy Seas

Parts of the structure, the centerpiece of the Biden administration’s efforts to boost aid to the Palestinian enclave, broke off; military says dock still functional

The New York Times

BREAKING NEWS

The pier in Gaza that the U.S. military constructed to provide much-needed humanitarian supplies broke apart in rough seas, the Pentagon said.

Tuesday, May 28, 2024 4:49 PM ET

Army engineers are working to put the pier back together, and Defense Department officials hope it will be operational again in about a week.
